Ling Luo a1847162
Yufei Wang a1897360
Yinkai Yuan a1909218

Location: Online Teams Meeting

Time: 5:30 PM – 6:05 PM, Monday, 14 October 2024 (Week 11)

Summary

For Sprint 4 review and Sprint 5 Planning meeting, we went over what we have achieved in Sprint 4, receiving feedback as well as suggestions from the tutor. We also presented our plan for Sprint 5, receiving clarifications on several questions.

Meeting Agenda

- Review of Sprint 3 Progress
 - Finished the majority of requirements
 - Finished front-end and back-end integration
 - Finished User Story 4 and Grafana integration
- Feedback and Suggestions
 1. Add more data to tags more than one tag to install range filter
 2. Add data range/threshold (eg. temperature range, 25-35) only for numeric values
 3. To be able to view the data in different graph types/options (types and visualization) table + graph

4. Options for users: line chart bar chart, pie chart, do three (use Grafana to select graph type, see what it offers, just variations)
5. Downloadable file of graph/output

- Sprint 5 Planning

1. According to PO suggestions, use sprint 5 to finish and finalise all required implementations
2. Start final report and process video planning

- Questions & Clarifications

- No points deductions for unfinished features (although at this stage we already finished the majority of it)
